Need a Mobile frontEnd developer?

Hello! I'm Fahri Saputra, a passionate Junior Front-End Mobile Developer with experience in Flutter, Dart, Firebase, Kotlin, and UI/UX Design.
I'm always eager to learn new technologies and improve my skills to create user-friendly applications with excellent performance.

Education

- **Idn Boarding School Solo**
  Rekayasa Perangkat Lunak (Software Engineering) 2022 - Sekarang

Experience

- **IDN Teaching Kediri**
  Teaching Ui/Ux Figma
  Stepping into my first Figma mentoring session in Kediri was an exciting journey. Sharing knowledge, guiding others, and refining design skills marked a new chapter in my professional growth. A rewarding experience that blended learning and leadership.

- **IDN Teaching Depok**
  Teaching Ui/Ux Figma
  Participating in the Figma Mentorship in Depok has been an invaluable journey, providing deep insights, hands-on experience, and essential design skills. This mentorship has significantly enriched my expertise in UI/UX, collaboration, and design thinking.

- **First Time Flutter Mentoring**
  Making Presensi App
  Led my first mentoring session on Flutter, focusing on the development of a presensi (attendance) app. Guided participants in understanding the fundamentals of Flutter, Firebase integration, and efficient UI/UX implementation for mobile applications. Assisted in troubleshooting and provided best practices for building high-quality mobile apps using Flutter.

- **Flutter Mentorship Malang**
  Making GoJek Replica
  I had the opportunity to be a mentor in a Flutter learning session at IDN Boarding School Malang, where I guided participants in building a UI replica of the Gojek application.
